## *A word from the mayor...*

*« It was one of those March days when the sun shines and the wind blows cold: when it's summer in the light and winter in the shade »  
- Charles Dickens, « Great Expectations »*

Spring is finally here and with it comes the opportunity to benefit fully of all that our beautiful community has to offer. It's the ideal time to come out, enjoy outdoor activities, become acquainted with nature again, reinforce our social ties and most importantly spend time with our family and friends. We hope that you will make the most of the best of our community.

Local ecocentres are important elements in modern waste management, not only reducing the ecological footprint but also supplying socio-economic advantages to the local communities.

The importance of a local ecocentre, here are some of the advantages this can have:

- ◆ Reducing the ecological footprint: Ecocentres offer citizens a practical way of reducing waste and recyclable materials which contribute to reducing the ecological footprint.
- ◆ Promoting recycling: Ecocentres encourage citizens to recycle more by offering installations to sort and recycle materials not taken by regular collection programs.
- ◆ Local economic development: Local ecocentres can offer local jobs, fiscal revenue for local governments and raw materials for recycling companies.
- ◆ Education : Local ecocentres can serve as learning centres for residents by supplying information on waste management, recycling and reduction of waste.
- ◆ Elimination of toxic waste: The elimination of toxic waste is a delicate task that require specialized measures which local ecocentres can provide safely and responsibly.

We are a community with incredible opportunities! It's important for us to make sure that this growth be guided in a way to promote the well-being of the municipality in the long term , We will continue to bank on our past plans and we will begin to have new conversations on the growth and future development of Saint-Anicet.

Finally, I encourage you to remain informed on the various community initiatives and the projects in the works. Be sure to take part in the public consultations and discussions that will mean improvements for our town.

For more information on our future plans, visit our web site at [stanicet.com](http://stanicet.com) for the latest news and details on how you can get involved. If you have questions please call my office at 450 264-2555 ext. 16.

I'm proud to be a part of this dedicated and dynamic community and I hope that you will have fun discovering all that Saint-Anicet offers during this season of renewal.

# Urban Development

## PROCESSING REQUESTS

Take note that we are presently receiving an exceptionally large number of calls, e-mails, requests for permits, certificates and others. For this reason, it is possible that there is a longer than normal delay in processing these requests. However, we are working very hard to maintain a general average delay of around two (2) to three(3) weeks. Be sure that we will answer your requests and will follow up on them. Please **do not send more than one message about the same subject** so that we can maintain our productivity, maximize our resources and customer service.

*Thank you for your patience and collaboration!*

## WORK IN MIND!

Don't forget to request your permit before starting work. When a permit or certificate is granted, it's because an inspector concluded that the projected work meets the municipal urban development bylaw demands. That is why a request for a permit must be accompanied by the documents necessary for this analysis and that a processing delay is to be foreseen. That is also why **the work cannot begin before said permit is granted, paid and recovered**. The issue of a permit is an authorization to construct or do what is requested and this request must be written, detailed and signed. It's a legal procedure that can seem complicated for some. We offer then a large range of information on our web site under the tab **Service aux citoyens / permis**. If in doubt, contact us. It's also possible to make certain permit requests on line via Voilà.

## SHORT TERM RENTAL ESTABLISHMENTS

Zoning bylaw 308 allows for short term rental establishments as complementary housing usage under certain conditions. We offer information on line on our web site under the tab **Service aux citoyens / permis**. A \$500 fee is required to obtain an occupation certificate which is valid for one (1) year starting on the delivery date. After this delay an occupation certificate must be obtained from the Municipality to continue activities or occupation. Don't forget that in Quebec, according to the law, any cottage, apartment or house rented for 31 days or less must obtain an official registration number from the Corporation de l'industrie touristique du Québec (CITQ).

## GRASS CUTTING

Don't forget that lots must be cut no later that June 1st of each year and that the maximum height of grass or brush is 20 centimetres. After, scything must be done regularly in order to respect the allowed maximum height. This does not apply to cultivated agricultural land or to the protected river bank.

## TEMPORARY SHELTERS

April 15, 2023 is the deadline to remove temporary shelters including the structure.

## RETAINING WALL, STABILISATION WORK AND WHARVES

Take note that for the whole of the province of Quebec, municipalities no longer have jurisdiction to issue permits for retaining walls (cedar post and piled stones). Please note that piled stones forming a stairway are not considered retaining walls. Since the spring of 2022, the department of the Environnement, de la Lutte contre les changements climatiques, de la Faune et des Parcs (MELCCFP) that can issue a ministerial authorization under certain conditions to install a retaining wall. A ministerial authorization is also required for any work to stabilise the river bank for more than 50 metres when plants, bushes are used, for any stabilization work of more than 30 metre when dry materials are used (ex. stones placed in steps), to install a wharf when the property already has one or to install a wharf that is more than 20m2 in area..

For more information on the steps to follow to request a ministerial authorization, we invite you to contact the MELCCFP at 450 928-7607 or consult the following web site:[environnement.gouv.qc.ca/autorisations/autorisations-ministerielles.htm](http://environnement.gouv.qc.ca/autorisations/autorisations-ministerielles.htm)

## BAN ON USE OF PESTICIDES AND FERTILIZER ON THE SHORE

Following the adoption of bylaw 478-2, the use of pesticides and fertilizers on the shore is now banned. According to the bylaw, pesticides include all substances or all micro-organisms intended to control, destroy, reduce, attract or repel directly or indirectly a harmful, toxic or a nuisance for humans, flora, fauna, harvests or other properties, or meant to serve as a vegetation growth regulator, excluding medication or vaccines, except if it is topical for exterior use on animals as defined in the law on pesticides. Here are a few examples of these exceptions, use of products for drinking water treatment, pools and secluded artificial lakes, indoor extermination, agricultural uses, in the case of infestations when all alternatives respectful of the environment have failed, etc..

### A WORD FROM THE ASSOCIATION POUR LA SAUVEGARDE DU LAC SAINT-FRANÇOIS (ASLSF)

The Association pour la sauvegarde du lac Saint-François (ASLSF) wishes to underline the action taken by the Saint-Anicet municipal council at its regular meeting of last April 3, by adopting bylaw 478-2 which bans the use of fertilizers and pesticides on the shore of the lake, a watercourse or a canal.

The application of this bylaw meets the objectives of the ASLSF which, since 1985 is working towards the water quality of Lake Saint-François. The ASLSF takes this opportunity to invite the citizens of Saint-Anicet to become members by going to its web site to register. All the information needed to register are on the site at the following address:

The Association des canaux de St-Anicet invites its members (and future members) to its annual general meeting, scheduled for **June 17, 2023 at 9 a.m. at the Saint-Anicet community centre**. This meeting will allow for an actual update on the situation related to our canals.

**\* Please confirm your presence by e-mail at [association.canaux@gmail.com](mailto:association.canaux@gmail.com) before June 2, 2023.**

At this meeting, you will be pleased to learn that we will proceed with the modification of our general bylaws in order to ratify the validity of your membership card. This card, **initially called for an annual membership fee, but will now give you a life time membership!**

For that matter, we are looking for candidates to fill the **position of administrator for the ACSA**. Persons with an interest in getting involved with the association as administrator or as representative, are asked to send a letter of intent by e-mail **before May 31, 2023.**

*\* You must be a member owner of a property on a canal.*

All the members of the association invite you to get involved and become a part of the solution to be brought forward for healthy canals, a healthy and improved living environment.

**The ACSA needs you!**

If you wish to support the ACSA, give weight to the measures and be sure to receive our communications and thus avoid misinformation, we invite you to become a member by contacting us by e-mail at [association.canaux@gmail.com](mailto:association.canaux@gmail.com) or through our Facebookgroup: [AssociationdescanauxdeSt-Anicet](https://www.facebook.com/AssociationdescanauxdeSt-Anicet)
